INPUT #b Inputs data from buffer *b* (sequential access).
INPUT #1,A,B

KILL Deletes a disk file.
KILL "PRG/BAS" KILL "FILE:1"

LINE INPUT Line inputs from keyboard: **(ENTER)** ends input.
LINE INPUT A\$ LINE INPUT "ENTER YOUR NAME?" IN\$

LINE INPUT # Line inputs from disk into specified buffer; carriage return, end-of-file, 255th character ends input.
LINE INPUT #1, A\$

LOAD Loads program file from disk. R option causes program to run, leaving open files open.
LOAD "PRG/BAS" LOAD "PRG:2", R

LSET Left-justifies data into a random access field.
LSET CITY\$="DULUTH"

MERGE Merges disk program with resident program. Disk program must be in ASCII format.
MERGE "PR/BAS"

MID\$(old, pos, len)=repl Replaces one portion of a string with another. If length option is omitted, same number of characters in the old string will be changed as the number of characters in the replacement string.
MID\$(A\$,3,4)="USAFX" MID\$(A\$,5)="01"

If omitted, 10 is used.
NAME 100, 10, 100 NAME NAME, 15

OPEN mode, b, file, n Opens file; assigns mode (I= input, O=output, R=random, E= Output to end-of-file); assigns buffer number *b*, *file* specifies filename; *n* specific number of files.
OPEN "R", 1 "CLIENTS.TXT"

PRINT #b Writes data to file-buffer *b* (sequential access).
PRINT #1,A

PUT b, record number Moves data from file-buffer *b* into the specified record (random access). If record number is omitted, current record number is used.
PUT 1,25 PUT 1 PUT C,N

RSET Right-justifies data into a random access field.
RSET CITY\$="SPOKANE"

RUN program Loads and executes disk program. R option leaves open files open.
RUN "PRG/BAS" RUN "PRG:1", R
